Subject: Flying Diamond Exploration

The Division of Oil, Gas and Mining has received an exploration proposal from SUMMO USA (other names used by the proponent are Constellation Copper and Lisbon Valley Mining) to do exploration drilling in the NE¼ of Section 9, Township 31 South, Range 26 East, SLBM. We understand a cultural resources survey was recently completed for this project and that a copy has been filed with the Division of State History by the BLM. We also understand one eligible site was found and that it will be avoided by using an alternate travel route. One other site was apparently found, but it is not significant.

We would like to proceed with approval of this project. Please let me know whether you can concur with this approval under the condition that an alternate travel route be used to avoid the one significant site.

Thank you for your assistance.
